**Notes from the Range:** Holsters - If you are going to qualify with a **semi-automatic** you need to have an **outside the pants, non-collapsible, hard case holster**. Individuals are showing up with leather holsters that don't hold their form and then trying to re holster. That has been adding some real safety concerns for our safety officers. We understand that revolvers don't really offer that as option and can work with that since there are not that many guys who qualify with them.

**Please make sure you have at least 3 magazines for your weapons.** Especially the lower capacity magazines. It really slows things down when you must keep loading magazines.
